Annual Progress Report

(January 2018- December 2018)

Pakistan Petroleum Limited (PPL)'s and Taaleem Foundation Collective Influence.

SUI, Baluchistan.

Notion

A change in the life & enterprise development skills, course work, and delivery method is combine contribution. Since the youngsters are positioning themselves for a micro enterprise activity and now they are inexperienced micro entrepreneurs, therefore it is imperative that their life & business skills training will be helpful for some practical project work, so that they could interact with the market practically. Along with this change to be stipulated in training, all the upcoming micro entrepreneurs under training must be indulged in the habit of raising a saving, so that, they could be able to raise a workable social collateral by the time they are prepared to enter a micro venture.

We are extremely hopeful that TF & PPL can actually undertake the challenge of fighting the un-employment for youth, successfully yet sustainably through the proposed vocational training institute and as per the believe of Pakistan Petroleum Limited (PPL) in empowering marginalized communities through skill development to create livelihoods opportunities for the poor's. During the last decades, the company has initiated various projects that enabled the poor population to generate livelihood opportunities.

Partner's Sketch

Pakistan Petroleum Limited (PPL):

Pakistan Petroleum Limited (PPL)'s Corporate Social Responsibility (CSR) program dates back to the start of PPL's commercial operations in Sui in the 1950s when the company established a school for children of workers and local communities. Since then, CSR has been the centerpiece of PPL's corporate ethos.

In 2001, the PPL Welfare Trust (PPLWT) founded to provide geographic and thematic diversity to the company's CSR program, which includes education, health, infrastructure development, socio-economic uplift of disadvantaged communities, particularly those living in and around its operating areas, and post-disaster rehabilitation.

Need analysis, scoping, planning and execution of CSR projects carried out through strategic local partnerships. To ensure swift delivery, maximum on-ground impact and sustainability of its social investments, all interventions occur after due consultation and mutual agreement with stakeholders, including community representatives, local governments and non-governmental organizations.

To further strengthen PPL's CSR portfolio and access the underserved in non-operational urban areas, the company has initiated corporate Donations Program in 2016-2017.

As one of the leading corporate providers of social development and welfare services in some of the most remote swathes of the country, PPL has received Pakistan Corporate Philanthropy Award for 12 consecutive years from 2004 to 2015.

Taaleem Foundation:

Taaleem Foundation (TF) is a non-profit, PCP-certified community support organization registered in Balochistan (Pakistan) since 1993 and in the Federal Capital Islamabad since 2010. The organization has a long-standing record of 28 years working for promotion of sustainable development, social mobilization and community engagement, building alliances and networks of local community organization, and social advocacy and awareness building in hardest to reach areas of Pakistan.

Taaleem Foundation has established a campus of School of Skills at Sui, Dera Bugti, which is register as Vocational Training Institute, Sui with Trade Testing Board (TTB) Baluchistan since 2015. The institute has facilities of classrooms, e learning, computer labs, and stitching and industrial apparel training and production facilities, 85KVA Sun Tracking Solar System, residential facilities, guesthouse, Messing facility, auditorium, strong internet connections and other facilities. The institute is serving local youth in providing skill-based training currently in dressmaking, hand and machine embroidery, industrial machine operating, and home textiles. The institute has plans for electronics labs, solar labs, mobile repairing, and such related skills as per demand of the employment sectors.

Geographical Magnitude

The Government remains committed to continuing reforms and the public sector continues to play a critical role in creating an enabling environment for strong and sustained economic growth and poverty reduction. Pakistan Vision 2025 envisages the private sector becoming the engine of economic growth innovation over the coming years. Although recent economic advances have been significant, 53 million Pakistanis classified as living in poverty. Unemployment continues to blight the country's labor force of 61.4 million and is a particular issue for young people

between the ages of 20-34. Additional demographic challenges, such as high population growth and rising rural-urban

Migration, as well as gender inequality and human-made and natural disasters are putting increasing pressure on the country's labor market. Compounding these challenges is the fluid security situation as well as environmental challenges. In a current scenario, Baluchistan is considering too much backward area of Pakistan in development sector this was the main reason to work over here with the perspective of enterprise development or also for the employment opportunities with the given background of said area. Dera Bugti is a district within the province of Baluchistan, Pakistan. It situated in a hill range, in a westward continuation of the Suleiman Range, pointing towards the Quetta node. The area these nomadic Bugtis inhabit is very barren. The discovery of natural gas deposits at Sui has brought new economic life to the area. The language of the people in this district is known as '"Bugti Balochi"' which is widely spoken in Dera Bugti, Sui, Kahan, Kohlu, Jacobabad and Sibi.

The Bugti territory was one of the last territories to fall to the British Colonial rule. The Bugti's defied the British the imperialism's force with great courage and fought a number of battles against the British troops during the 19 century. They, however, came to a truce in the last quarter of the century when the British Government's rule extended to present Dera Bugti. The later constituted then a part of a wider administrative unit, Sibi District, until 1974. In 1974, the Dera Bugti Agency reorganized to create Nasirabad district and Kohlu Agency. This territory was included in Kohlu Agency from which it was detached in July 1983 to form Dera Bugti Agency.

Dera Bugti started functioning as a district on July 1983. Formerly, Dera Bugti agency administered as a part of Sibi until 1974. Latterly, it was under administration of District Nasirabad. The name originates from 'Dera', which means a house or territory and 'Bugti' is the main Baloch tribe. Dera Bugti is also the name of important town in the district. The district is

located in the eastern part of Balochistan Province, sharing its boundaries in the north with District Kohlu. District Sibi and Nasirabad are in the west and Jaffarabad district in the south. The district comprises of a major mineral reserve of natural gas at Sui, which discovered in 1963. The first natural gas supply plant established at Sui in 1963. There are four major gas fields: Sui gas field, PirKoh Gas field, Loti Gas field and Uch Gas field. In addition to these four fields, gas believed to be present in other parts of the Dera Bugti district. The terrain of district comprises vast plains in the south and hilly area in the north: elevation varies between 57-1,400 meters above sea level.

Overall Development

PPLWT founded in 2001 to provide geographic and thematic diversity to the company's CSR program around its areas of its business operations, which includes education, health, vocational/technical training, infrastructure, water & sanitation and emergency response.

In the reported period, the local beneficiaries and communities become well inform about the social development activities of the company. Various stakeholders understand that PPL communities have due to PPL effort they moved up the ladder of socio-economic profile during the past 10 years. In terms of socio-cultural impact, it has recognized that the communities are better inform about their rights and obligations; and are better equipped in devising local solutions. The economic impacts and standard of living has considerably improved due to enhanced level of income. The communities around PPL gas field areas have considerably benefitted from access to education, health, livelihood, water, markets and infrastructure. In the field of education, it has generally recognized that access to schools, colleges and universities and quality of schooling has improved over the years in the company's area of operations. Taaleem Foundation Educational Complex in Sui and PPL partnership is improving the quality of learning in educational institutions.

During the reported time PPL reach out to the communities through its social development partners TF and adopt a self-sustaining, self-scaling, integrated development model to spur human development in the area of its business operations with sustainable strategy. The Roll out technology-based and cost-effective solutions in education and training on the pattern of Sui, that has borne fruitful results for the community in a short period. TF efforts has built strategic partnership with local organizations and government departments to support work and development plans.

Contribution for the Improvement of Community:

The major contributions of PPL & TF are Infrastructure development ,Community live hood, Vocational trainings, Trend of social entrepreneurship, Capacity building of staff and teachers , Provision of Solar city, Trainings ,VU campus in a remote area, Growth in community through awareness and resource mobilization and its "Vocational Training Institute, Sui". Taaleem Foundation institute serving by engaging the local youth and provided skill based training in dress making, hand and machine embroidery, industrial machine operating, and home textiles.
In the reported period Pakistan Petroleum Limited, major contribution was in following areas:

- School Building with complete furniture
- Staff Hostel with complete furniture
- Admin Block
- Transport facility
- caters VU/VTI staff members
- Water supply to school provided
- Free medical facility in PPL Welfare Trust Hospital

In the application development phase, Taaleem Foundation has approached the partnering enterprises to seek and identify the skills shortage in local market. As a result of series of consultative meetings Taaleem Foundation (TF) and partnering enterprises prioritized selected

sets of needs, on the basis of which, training program is built, conceptualized, and designed to address the skills shortages in the area.

Infrastructure Development:

Since Pakistan Petroleum Limited (PPL)'s core business entails working in remote areas for exploration and production of hydrocarbons, the company focuses on developing infrastructure and civic amenities not only for its own use but also for local communities.

Important, strong framework is a vital piece of advancement. In Pakistan, particularly in far-flung regions, such offices are either not accessible or of low quality. These outcomes in an expansive populace, especially the distraught, directing a minimized existence without access to essential offices, for example, street systems, schools whole setup of SUI VTI infrastructure and the some other needs including guardhouse and washrooms are examples of the PPL's commitment through infrastructural development.

Community Livelihood:

More than 33% population of Pakistan surviving below the poverty line and they are unable to afford the basic needs for their survival including food. To eliminate poverty, it is necessary to create livelihood opportunities on sustainable basis for the people living below the poverty line as it will enable them to fulfill basic need of life i.e. food, health and shelter.

With the collaboration of Taaleem Foundation Pakistan Petroleum Limited (PPL) believes in empowering marginalized communities through skill development to create livelihoods opportunities for the poor's. Vocational Training Institute SUI is one of the best examples of this collaboration where most of the people are learning best skills for their livelihood.

Trend of Social Entrepreneurship:

In the early days of social entrepreneurship with a strong partnership of TF & PPL, pioneered important innovations were non-profits. For many young people today, however, social entrepreneurship is about a commercially viable enterprise.

"Designing a business model to solve these problems does not mean you're going to turn a profit – not in year one or two, but maybe not even in year five. Otherwise, conventional businesses would have stepped in already".

Now they are able to serve in the community for the betterment and for a cause just because of the skills, which they learned from the center. That was the main purpose of PPL and TF to establish a skills center in that remote area.

Vocational Trainings:

Important contribution of TF & PPL is its "Vocational Training Institute, Sui". Taaleem Foundation institute serving by engaging the local youth and provided skill based training in

dress making, hand and machine embroidery, industrial machine operating, and home textiles in community.

Under this project, we are providing the best skills to the community in their targated area, through different training sessions according to the need of community and market.

As already discussed in the introduction about remote area now its first time that community members are taking interest in these trainings and skills comparatively in start they were willing to participate in these kinds of activities.

Majorcontribution is made by TF social mobilizers, to move and contribute in the local community. Machines and PPL certificates will be provided to the ongoing batches and internship opportunities.

Capacity Building of Staff and Teachers:

With a strong support of PPL we are contributing a main role in the community to provide trainings for the Capacity building of staff and teachers through the latest technology in schools and in other institutes.

Because In this century, everyone has the ability and capacity to be both a follower and a leader those who try to exert authority over others without their consent will not only questioned, they are likely to shun. Learning to appreciate others' strengths will not be enough… Learning how to leverage each other's strengths will be a key to working together, creating new work, solving problems and achieving new goals.

Solar City:

Provision of Solar City from the PPL is a great contribution for the community on both ends, either its cost effective or also a plate farm for the students to learn more about the solar system. They can provide easy and cost effective solutions to the community because Pakistan is full of potential of alternate renewable energy resources, i.e. solar, wind, etc. From the available options

of the renewable energy, the installation of the solar energy is the most suitable option for the domestic customers. The solar panels can installed on the roofs of the houses/offices/buildings. According to the studies, Pakistan has 2.9 million Mega Watt of solar energy potential. But we are using only 400-500 MW of this huge potential.

Virtual University in Sui, Dera Bugti:

In the reporting period, major sustainable way of improving livelihoods and well-being of underserved communities in the country is by providing them access to quality education. Pakistan Petroleum Limited (PPL) establishes a higher education facility for the benefit of stakeholder local communities

PPL has an abiding stake in improving quality of life of local communities in Baluchistan since the discovery of its flagship gas field in Sui during the 1950s. **A multi-purpose event was organized at TF Auditorium Sui to achieve these two major objectives for VU and SoS:**

- VU New Student welcome and Orientation on LMS
- VU handing out Degree to First Ever Graduate of TFVU campus Sui
- VU Students encouragement and Reflections

Other Contribution in the reported time:

1. Introduction of Enterprise: SR
2. SoS Partner Enterprise took initiative to address Youth
3. Encouragement for CBT Students

Social Mobilization & Facilitation for Employment:

PPL and TF will work collaboratively for employment of trainees. Provided that the partnering enterprises, as stipulated above, will partake in the identification and selection of the trainees, Taaleem Foundation believes the potential for employment of the selected trainees should relatively be high and so will be discussed and agreed upon at the identification and selection of the trainees.

The enterprises will induct individuals as employees and will also adopt responsibility of facilitation in establishing local revolving fund (hosted by TF) for supporting trainees opting for self-employment. Where applicable, the enterprises will also offer micro-grants to individuals for setting up small businesses. The enterprises will also facilitate TF in identification of support organizations for achieving employability targets of this training program.

Reported Month and Community Development Target

It's been quite encouraging to seek that community is satisfied with the technical skills attainment process followed by the institute. They are sure that these skills can bring a change in their employment status in the upcoming near future.

There has been a tremendous recall for life skills and enterprise development skills concepts, as all of the respondents have been able to map out what major concepts they had learned during these classes.

Taaleem Foundation School of Skills, Sui

Balochistan is the land of rich cultures and folks. Embroidery is the essence of this land and Balochi women are skilled with this art. Taaleem Foundation school of skills is a name of technical institution which trains the local women and empower them. Taaleem Foundation school of skills is a key element in the local market which is creating small entrepreneurships in sui and TFSS is platform where the local women show their art and TFSS displays their art and work at different platform. TFSS was invited to set a stall in Capital University of Science and technology, Islamabad to celebrate annual world NGO Day. TFSS displayed its products. Visitors were happy to see the work of Sui dera Bugti and TFSS stall was appreciated.

The NGO World - NGO Day Exhibition

With the slogan "Live for Others", TNW is working in various sectors of social well-being including Education, Leadership & Entrepreneurship, Poverty Alleviation, Disaster Management, Economic Empowerment, Peace & Harmony, Disaster Response, Orphan & Widows Support and Capacity Development Programs.

The 'NGO World', a non-governmental organisation, arranged a day-long function in collaboration with the Capital University of Science and Technology (CUST) and 'Taleem Foundation to observe the 'World NGO Day' at the CUST campus.

Representatives of more than 100 NGOs from all over Pakistan participated in the event. The participating NGOs set up their stalls and distributed the reports and pamphlets, highlighting their field of work, efforts they have or are making and the goals and objectives they had achieved.

The 'NGO World' started observing the day in 2014 when Marcis Liors Skadmanis announced to observe February 27 as the 'World NGO Day' and it was the fifth successive event they had arranged this year to mark the day.

Zafar Iqbal, the 'Goodwill Ambassador' said that observing this day is more important than ever, as we are living in difficult times for NGOs and for civil society around the world, NGOs are a voice for those who are too often not heard.

The activities arranged on the day included a 'National Conference for Greater Good', display of projects of different NGOs; a 'Job Fair' aimed providing access to the students to connect with social sector.

The Vice-Chancellor of the CUST, Dr. Mansoor Ahmed, was the guest of honor and inaugurated the event. The Ambassador of Portugal to Pakistan, Mr. Joao Paulo Marques Sabido Costa was the 'Chief Guest' for the exhibition.

Marcis Liors Skadmanis, Founder of 'World NGO Day' shared his views through video link and appreciated the efforts made by Zafar Iqbal, the 'Goodwill Ambassador for World NGO Day Pakistan' and Abubakar Siddique, Director Volunteer in Service, CUST to organize such a successful event.

Earlier, the 'Goodwill Ambassador World NGO Day Pakistan', Zafar Iqbal, highlighted the importance of the day. He urged all the organisations to act together for social and greater good. He also shared the future plans of his organisations with the participants.

Abubakar Siddique, Director Volunteer in Service (CUST) shared the vision of VIS department of CUST. He emphasized the importance of volunteer work for students in social and development sector to become a useful citizen of this country.

Dr. Saeed Elahi, Chairman Pakistan Red Crescent Society, was the chief guest of 'World NGO Day'. He appreciated the efforts of the 'NGO World' and CUST for organizing the event. He highlighted the importance of on social work to make the world a safer and better place to live. He also appreciated the participation of youth and expressed the hope that youth would continue to participate in such of events and groom as civic leaders.

In the end an 'Islamabad NGO's Declaration for Greater Good' was also passed in which the participating organisation agreed on a 20 point agenda that lays down a set of guidelines for the NGO sector to deliver effectively for the target communities and earn a good name for not only the social sector but also for the beloved homeland.

Every year TNW celebrates the annual day of NGO World on February 27 and this year TNW celebrated this day in Capital University of Science and Technology, Islamabad. TF was invited to set its stall in exhibition to show-case the products at wider level.

1. Representation of Taaleem Foundation School of Skills for Exhibition

Exhibition is a place where all things are displayed and TFSS fixed a stall in this exhibition to showcase. TGSS hung the waste coats, ladies suits and shawls and also pasted the key chains and braids.

Mr Younis, Trainer was specially invited from TFSS, sui to tell about the city and about products. He was representing the true culture of Sui and people were happy to see him and taking photos with him.

Mr Razi, worker (karigar) was called to tell about the work and products. Visitors liked to meet with this young worker and took photo with him.

2. Special display (Balochi Stick – Hes)

Hes (Balochi Stick) is the recognition of Sui and it is a colourful stick which is made of different colours. These stick captured the attention of visitors and it was new to them. Visitors seen it very first time

3. Brief Introduction of Hes artist, Mr Baksho

Mr Bakhsho Bugti belongs to Sui, Dera Bugti and he is an artisan of stick printing. He is an expert in making of traditional stick (Hes). He is working when he was young and feels proud to do the tribal traditional art.

4. Certification Receiving

Certificate distribution ceremony was held and TF was awarded with the certificate and a shield.
